

Success Story

The Project Scope was to Replace and upgrade the **Chlorine (Cl₂)** Dosing Equipment at Yanbu-Medina Pipeline (Medina End) for Our valuable Client SWCC.

After Studying the Project and Client's Actual Need, KITS proposed the Alternative Solution of Installing a **Chlorine Dioxide (ClO₂)** Dosing Equipment in Coordination with Technology and Process System's Provider **M/s: GRUNDFOS**.

The Proposal was accredited by SWCC's Acceptance and approval.

The **Chlorine dioxide (ClO₂)** Dosing System was Manufactured and supplied by **M/s: GRUNDFOS** and Installed by **KITS** and is in Successful Operation Since 2018. (Letter of appreciation attached)

GRUNDFOS. Chlorine dioxide (ClO₂) Dosing Equipment Installed at SWCC Yanbu-Medina Pipe line
